

VSC TRAINING SOLUTIONS

Preparing your people for challenging environments

www.vscsecurity.com

■ ***Education, Awareness, Development***

VSC provides effective and immersive training solutions that equip your people with the skills they need to safely and professionally do their job. We are proud of our international accreditations and as a Highfield International and RoSPA Training Centre, you know standards are high. Training is at the heart of VSC's ethos and we utilise trainers with a lifetime of experience and specialist skills to ensure we deliver real value with every course.

■ ***Interactive & Involving Learning***

A combination of years of experience and knowledge on the subject matter leads to an unparalleled level of expertise. Our Instructors are renowned and qualified to deliver training programs that match their areas of specialist expertise. We take pride in our instructors, and believe they are the heart of the learning experience. VSC is committed to a competency-based approach to training. This means that we do not just seek to provide the information, but we also endeavour to test competencies. Ultimately, effective training needs to be as interactive and involving as possible and we work hard to ensure this is the case with our course delivery.

■ ***Simulation Scenarios***

We believe that simulations engage students in deep learning that empowers understanding instead of surface learning, which requires only memorisation. Attendees graduate with a greater sense of security and are prepared to do the right thing in threatening situations.

VSC Training Services

Hostile Environment Awareness Training - HEAT

Working in hostile environments requires the right tools. VSC provides anyone who works or manages personnel in complex environments access to various interactive learning modules designed to help them stay safe.

HEAT combines theory with realistic and immersive simulation training. Our course provides participants with the required know-how and skills to deal with real-time threats. The training offers a mix of theoretical and practical sessions and exercises that teach the skills needed to make better decisions in the event of a crisis.

Medical Training

Medical training provides your people with the skills they need to respond effectively to emergencies. Courses include theoretical and practical exercises with an emphasis on effective problem recognition and response.

Our courses span basic first aid to paramedic qualifications. From the most basic level, we build knowledge and skills that allow our students to manage situations confidently in a prompt, safe, and effective way. This preparation can improve outcomes, particularly where professional medical help is not immediately available.

Driver Training

Road travel represents a severe risk to your organisation's personnel. In places where roads can be of poor quality and driver standards may be low, you can't afford to ignore the risks.

Safe driver strategies enable the identification of hazards and reduce risk in all types of driving environment. These strategies go well beyond instruction on basic traffic laws and procedures by demonstrating how drivers should plan ahead, adjust speed in line with the situation and be aware of vulnerable road users.

Defensive Driver Training courses provide intensive instruction with a road safety expert. Our courses are designed with an organised and systematic approach to enhance the students driving skills whilst teaching the knowledge and skills to identify, anticipate, prioritise and deal with hazards in various situations. Focus on safety awareness of other drivers.

Security Management Training

When operating in complex environments, managing risk and effectively controlling incidents should form a crucial part of an organisation's planning. To help you achieve this, we can provide security management training.

The course is tailored to fit your needs and equips students with a detailed overview of the critical elements of organisational security and incident management. The training is practical and includes exercises that ensure a clear understanding of the topics through an interactive approach that challenges participants and provides them with a toolbox of directly applicable methods to mitigating risks across all types of operations.
